## Plan

The continuous improvement of Internal Audits demands that we devote a portion of our effort to developing a strategic plan as well as an annual operating audit plan. Our long-term goal is to develop highly proficient audit professionals to meet the increasing demands of a growing Riverside County. We will meet the audit requirements established by the Government Code and Board of Supervisor's Resolutions, and will continue to identify and address areas of risk within the county operations.

The audit plan for 2013/14 is driven by several factors, including:

1. Mandated audits in accordance with California Government Code and Board of Supervisors' Resolutions;
2. Consultations with county management;
3. Comprehensive county-wide risk assessment conducted by the independent contractor, IntelliBridge Partners
4. Changes within the audit profession; and
5. The changing role of internal auditors within the county.

The recognition that internal auditors provide both assurance and consulting services while retaining their independence and objectivity is a cornerstone of the new professional definition. Its reality is demonstrated by our changing role in the county. Increasingly, customers seek our assistance and counsel as they address business issues rather than wait for a "post audit" process to validate or critique their efforts.

## Fiscal Year 2013/14 Audit Plan

The Internal Audit Plan for the fiscal year 2013/14 includes 28 audits and is designed to meet the objective of providing a timely and comprehensive scope of audit coverage. The Audit Plan constitutes the schedule of audits comprised of planned audits, other direct audit activities, and an allocation of time for requested audits, which may arise during the course of the year. The latter recognizes we exist in a dynamic environment and the Audit Plan requires some margin of flexibility.

Risk assessment is a fundamental auditing concept premised on the need to concentrate our efforts in the areas of the greatest relative risk. This is a more efficient and focused approach to providing audit coverage on a cyclical basis. "Risk" for this purpose does not imply any unwarranted business strategy or lack of management oversight; however, most risk is inherent in the business activity. As such, while most of our audits are cyclically driven by the requirements of the Government Code and Board of Supervisors' Resolutions, the scope of those audits will be dictated by the comprehensive county-wide risk assessment conducted by the independent contractor, IntelliBridge Partners and the consultations with county management.

The Audit Plan is intended to represent our primary means of providing audit coverage to the areas identified as having the highest business risks while complying with the requirements of the Government Code. It also provides broad audit coverage to the various components of the county's business operations.

**Mandated Audits.** California Government Code requires the Board of Supervisors to audit the financial accounts and records of all officers having responsibility for the care, management, collection or disbursement of county funds every two years and a quarterly count of assets held by the Treasurer. Government Code also requires the Auditor-Controller to ensure the scope of internal audits includes an examination of the organization's system of internal controls and follow-up on prior audit findings and recommendations.

**Special Concerns and Other Allocation of Audit Time.** We reserved audit hours to address audits of concern from the Board of Supervisors and potential incidents of fraud, waste and abuse identified through the Fraud, Waste, and Abuse Program.

## Dedication of Resources to Audit Related Services

Our Audit Plan is based on services to be provided by our audit professionals. In addition to the audit projects outlined in the audit plan, audit staff will be involved throughout the year in various other audit initiatives and tasks as follows:

**Cash Shortages/Overages.** We will continue to devote time to the reviews of departmental cash shortages and overages throughout the year.

**Review of Special Districts' Financials.** The Auditor-Controller has the responsibility to ensure Special Districts receive an annual financial audit. These audits are usually performed by public accounting firms. Internal Audit staff monitors the submission of Special Districts' financial statements to ensure they are conducted as required by Government Code and reviews the reports in order to identify any concerns.

**Transition from TeamMate Audit Management System to Microsoft SharePoint.** With the implementation of electronic working papers in fiscal year 2004/05, we have achieved an increased level of efficiency in conducting audits. TeamMate's audit software eliminates the barriers associated with paper-filled binders and disconnected electronic files, driving efficiencies into all facets of the internal audit workflow. However, the IT Division of the Auditor-Controller's Office is in the planning stages of implementing the usage of SharePoint to replace the shadow system TeamMate and provide a cost savings of approximately \$10,000 a year. This migration to utilizing the new software requires complete project management and technical attributes and involvement from the IT Division along with the Internal Audit staff (the end user) to ensure all components are transferred and we are provided with the same tools and resources to have an effective audit management system.
